EXPERIENCE

Software Developer, *Netparam Technologies Pvt. Ltd.*

03/2025 – 04/2026 | Jaipur

- Architected and maintained backend services using **Node.js** and **Express.js**, powering production applications serving **500+ active users**.
- Engineered **30+ REST APIs** spanning authentication, business workflows, and data management across multiple production applications.
- Slashed average API response time from 1.8s to 450ms, a **75% improvement**, by optimizing **MongoDB** queries, implementing strategic indexing, and eliminating redundant data fetching.
- Built reusable, modular **React components** that strengthened UI consistency and accelerated feature development cycles.
- Owned the complete feature lifecycle, including **API design**, testing, debugging, deployment support, and production issue resolution, end to end.
- Drove code quality and application stability by collaborating in **Agile** teams, participating in code reviews, and resolving production issues.

TECHNICAL SKILLS

Languages — C++ | JavaScript (ES6+) | SQL

Frontend — React.js | Redux Toolkit | Context API | Material UI | Tailwind CSS | HTML5 | CSS3

Backend — Node.js | Express.js | RESTful APIs | JWT Authentication

Databases — MongoDB | MySQL

Cloud & Tools — Git | GitHub | Postman | Vercel | Render | AWS (EC2, S3) | MongoDB Atlas | Docker

Core CS — Data Structures & Algorithms | Object Oriented Programming | DBMS | Operating Systems | Computer Networks

PROJECTS

[Dealskart](#)

Full stack **e-commerce platform** supporting product discovery, secure checkout, and order management.

- Built shopping workflows including **product browsing**, **cart**, **checkout**, and **order management** for **500+ product listings**.
- Integrated **JWT authentication**, **Razorpay** payment gateway, and **inventory validation**, supporting **100+ successful orders** with secure payments and accurate inventory management.
- Optimized **MongoDB queries** and backend APIs, reducing API response time by **~25%** and improving overall application performance.

[QuickStay](#)

Hotel booking platform that enables users to search and book rooms online while allowing hotel owners to manage listings and reservations.

- Built room search, booking, and online payment workflows.
- Integrated **Razorpay** and implemented **booking clash prevention** to eliminate double bookings of the same room.
- Developed an **admin dashboard** with live booking and revenue analytics and integrated **Clerk** authentication with **webhook based user synchronization** to MongoDB.

[StudyAdda](#)

EdTech learning platform for online course management with separate **student and instructor portals**.

- Developed **role based dashboards** with **JWT based authentication** and **authorization** for students and instructors, enabling secure course management.
- Implemented **course enrollment**, **progress tracking**, and **Razorpay** payment integration.
- Built **20+ REST APIs** to support course delivery and learning workflows, and integrated **Cloudinary** for secure video and image management.

EDUCATION

B.Tech in Electrical Engineering, *Jaipur Engineering College & Research Centre*

2020 – 2024

CGPA: 8.20/10
