

DINESH SUWALKYA

Full Stack Developer | MERN Stack

✉ dineshsuwalkya31@gmail.com ☎ +91-7023012220 🔗 [Portfolio](#) [LinkedIn](#) [GitHub](#)

SUMMARY

Full Stack Developer with 1+ year of production experience shipping and optimizing MERN applications. Delivered features for 500+ live users, designed 30+ REST APIs, and reduced query latency by 25% through indexing and query optimization. Solved 300+ DSA problems. Targeting full stack roles at product driven companies where ownership, performance, and scalability matter.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), C++

Backend

Node.js, Express.js, REST API, JWT, MVC, Middleware, RBAC, Authentication

Tools

Git, Postman, VS Code

Frontend

React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Databases

MongoDB (Indexing, Schema Design, Atlas), MySQL

Core CS

Data Structures & Algorithms, OOPs, DBMS, OS, Computer Networks

EXPERIENCE

Software Developer, Netparam Technologies Pvt. Ltd.

12/2024 – Present | Jaipur, Rajasthan

- Designed and shipped 30+ secure REST APIs with JWT auth and RBAC, improving reliability and maintainability for 500+ active users.
- Reduced MongoDB query response times by ~25% via targeted indexing and query restructuring under concurrent production load.
- Built 50+ reusable React components, standardizing UI patterns and accelerating feature delivery across sprint cycles.
- Collaborated in an Agile environment, contributed to code and design reviews, and resolved production incidents maintaining system stability and code quality across sprint cycles.
- Owned end-to-end feature delivery API design, schema, and React UI consistently meeting sprint deadlines.

PROJECTS

[ExamStream - Online Examination Portal](#) 🔗, React.js • Node.js • Express.js • MongoDB • Context API • JWT

- Built a 3 role exam platform (Student, Organization, Admin) with real time submissions, auto scoring, and role specific dashboards fully live with real users.
- Designed 20+ REST APIs with role based access control each role sees and accesses only what it is allowed to.
- Added tab switch detection and auto submit on timeout to prevent cheating; leaderboard results load instantly via MongoDB indexing.

[Dealskart - E Commerce Platform](#) 🔗, React.js • Node.js • Express.js • MongoDB • Redux • JWT • Razorpay • Cloudinary

- Built complete e-commerce system handling 100+ real transactions and 500+ product listings; maintained stable performance under concurrent user load.
- Integrated Razorpay for payments and JWT for secure login; optimized MongoDB queries cutting API response time by ~25%.

[Study Adda - EdTech Learning Platform](#) 🔗, React.js • Node.js • Express.js • MongoDB • Redux • JWT • Razorpay • Cloudinary

- Built end-to-end EdTech platform with student and instructor roles, course purchases via Razorpay, and video delivery via Cloudinary.
- Designed scalable backend with enrollment workflows, progress tracking, and content delivery demonstrating full ownership across the entire stack.

EDUCATION

B.Tech in Electrical Engineering

2020 – 2024 | Jaipur, Rajasthan

Jaipur Engineering College & Research Centre - CGPA: 8.20/10

ACHIEVEMENTS & CERTIFICATIONS

- [Solved 300+ Data Structures and Algorithms problems across coding platforms.](#) 🔗
- NPTEL Certified — Problem Solving through Programming in C, IIT Kharagpur
- DSA Certification — CodeHelp by Love Babbar
