PROFILE SUMMARY

Full Stack Software Engineer specializing in the MERN stack with hands on experience delivering 3 production deployed web applications and 20+ RESTful APIs across the full SDLC in Agile environments. Proficient in JWT based authentication, role based access control, MVC architecture, and integrating open source third party services. Collaborative team player with strong debugging expertise, analytical problem solving skills, and a passion for writing clean, maintainable, and scalable code in fast paced, cross functional teams.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive UI Development

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware, Secure Cookie Handling

Databases: MongoDB (Schema Design, Query Optimization), MySQL

Tools: Git, GitHub, Postman, VS Code, MongoDB Compass, MySQL Workbench

Third Party Integrations: Cloudinary, Razorpay, GetStream.io (Chat & Video SDK), TanStack Query, Clerk Auth

Core CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Soft Skills: Complex Problem Solving, Structured Debugging, Cross Functional Collaboration, Adaptability

WORK EXPERIENCE

Software Engineer Intern – Full Stack Development | C-DAC, Jaipur

Sep 2025 – Present

Stack: MERN | JavaScript | REST APIs | Git | HTML | CSS

- Delivered full stack features across 3+ internal modules, working through the complete SDLC from gathering functional requirements to deployment and iterative debugging in a cross functional team.
- Built 10+ reusable React components and RESTful API endpoints, reducing development time for recurring UI patterns and improving consistency across the application.
- Optimized 5+ MongoDB queries and redesigned 2 collection schemas, improving data retrieval efficiency and supporting cleaner, more maintainable backend architecture.
- Participated in collaborative code reviews, debugging sessions, and iterative feature development using Git based version control strengthening delivery quality in a team environment.

PROJECTS

StudyAdda – Online Learning Platform |  [Live](#)

Jan 2026 – Feb 2026

Stack: React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Razorpay, MongoDB Atlas

- Architected and deployed a full stack ed tech platform with 20+ RESTful APIs, JWT based auth, and role based access control RBAC supporting 3 user roles (admin, instructor, student) with fully protected routes and middleware.
- Integrated Cloudinary for scalable media uploads and Razorpay for payment processing, enabling end to end course transactions and reducing manual content management overhead.
- Optimized MongoDB query patterns and implemented indexing to improve API response time and reduce redundant database reads.

Voxtalk – Real Time Chat & Language Learning App |  [Live](#)

Nov 2025 – Dec 2025

Stack: React.js, Node.js, Express.js, MongoDB, JWT, GetStream.io SDK, TanStack Query, Tailwind CSS

- Engineered a secure MERN application with JWT authentication, HTTP only cookies, and fully protected API routes delivering a reliable, production grade backend.
- Integrated real time chat and video calling via the GetStream.io open source SDK adapting third party tools to meet application specific requirements without custom socket infrastructure overhead.
- Optimized client side data fetching and caching using TanStack Query, reducing redundant API calls and minimizing unnecessary re renders for improved UI responsiveness.

Quick Stay – Hotel Booking Application |  [Live](#)

Oct 2025 – Nov 2025

Stack: React.js, Node.js, Express.js, MongoDB, Cloudinary, Clerk Auth, REST APIs

- Designed 15+ RESTful APIs covering hotels, rooms, bookings, and users with Clerk auth, custom middleware, and clean MVC architecture translating business requirements into production ready features.
- Implemented real time room availability tracking and booking history, covering the complete booking lifecycle from search to confirmation.

EDUCATION

B.Tech, Electrical Engineering | Jaipur Engineering College & Research Centre

CGPA: 8.20 | 2020–2024

XII (RBSE) | K.M.D Public Sr. Sec. School, Jaipur

72.40% | 2019–2020

ACHIEVEMENTS & CERTIFICATIONS

- Solved 250+ coding problems across competitive platforms consistently applying data structures, algorithms, and debugging skills to optimize solutions.
- Problem Solving through Programming in C NPTEL (IIT Kharagpur) | Data Structures & Algorithms - CodeHelp by Love Babbar
